PROFESSIONAL SUMMARY

Senior Full Stack Software Engineer and Technical Lead with 6+ years of experience building enterprise web, mobile, e-commerce, healthcare, financial, energy, IoT and AI-driven products. Strong background across React, Next.js, React Native, Node.js, NestJS, Python, C#/.NET, Salesforce Commerce Cloud, Salesforce Marketing Cloud, SQL/NoSQL databases and cloud platforms including AWS, Azure and Oracle Cloud. Experienced in technical leadership, mentoring, code reviews, stakeholder management, headless commerce, microfrontends, middleware, API integrations, data modeling, marketing automation, data quality/governance and delivery of end-to-end features in distributed teams.

CORE TECHNICAL SKILLS

Frontend: React, Next.js, React Native, JavaScript, TypeScript, HTML5, CSS3, Sass, Redux, responsive UI, reusable component systems, microfrontends

Backend & APIs: Node.js, NestJS, Express.js, Python, FastAPI, Flask, Django, PHP, C#, .NET, ASP.NET Core, REST APIs, SOAP, middleware, microservices, OAuth 2.0

Salesforce & MarTech: Salesforce Commerce Cloud / B2C Commerce, SFRA, Business Manager, PWA Kit, Managed Runtime, OCAPI, SCAPI, Commerce API, Salesforce Marketing Cloud (SFMC), AMPscript, Data Extensions, Journey Builder, Automation Studio, CloudPages, CRM and e-commerce integrations

Data: SQL, PostgreSQL, MySQL, SQL Server, MongoDB, Entity Framework, data modeling, segmentation, data quality, data governance, analytics pipelines

Cloud & DevOps: AWS EC2, RDS, S3, CloudWatch, SNS; Microsoft Azure App Service, Functions, Storage; Oracle Cloud Infrastructure; Docker, Git, CI/CD, Linux, Jira

AI, Messaging & Testing: Hugging Face, Transformers, NLP, generative AI, Meta Graph API, WebSockets, MQTT, Redis, RabbitMQ, Celery, Twilio, Selenium, Jest, end-to-end testing

PROFESSIONAL EXPERIENCE

Senior Full Stack Developer / Salesforce Engineer | Globant Jun 2021 - Present

Career progression from Junior Salesforce Commerce Cloud Developer to Semi Senior Full Stack Developer and Senior Full Stack Developer.

Globant Enterprise AI - Senior Full Stack Developer | 2025 - Present

- Develop and support end-to-end capabilities for Globant's enterprise AI agent marketplace, used by business customers to discover, access and manage proprietary AI agents.
- Build React frontend features and Node.js backend services, with a strong focus on middleware that orchestrates requests, business rules, data transformation and integrations between UI, internal services and external APIs.
- Provide technical leadership through solution design, code reviews, mentoring, incident analysis and coordination with product, QA and platform stakeholders.
- Improve reliability and maintainability of production features by refactoring integration layers, standardizing API contracts and supporting new business capabilities across frontend and backend.

Soriana - Full Stack Developer / Salesforce Commerce Cloud | 2023 - 2025

- Helped implement a headless e-commerce experience using React with Salesforce Commerce Cloud, PWA Kit, Managed Runtime and Commerce APIs.
- Delivered custom commerce features and third-party integrations involving catalog, cart, customer, promotions, orders, multiple inventories, store-level availability and fulfillment flows.
- Integrated CRM, e-commerce and marketing platforms through REST/SOAP APIs, supporting consistent customer and commerce data across systems.
- Worked with Salesforce Marketing Cloud capabilities including Data Extensions and data modeling, Journey Builder, Automation Studio, CloudPages and AMPscript to support segmentation, automated customer journeys and marketing execution.
- Contributed to data quality and governance by validating integration payloads, customer attributes, segmentation inputs and cross-platform data consistency; collaborated with business and technical stakeholders using Jira and agile delivery practices.

El Palacio de Hierro - Salesforce Commerce Cloud Developer | 2021 - 2023

- Started as a Junior Salesforce Commerce Cloud Developer and progressed into broader Full Stack responsibilities while delivering new features, site redesign work, bug fixes and production support for a large retail e-commerce platform.
- Developed and maintained SFRA storefront and backend logic using Salesforce B2C Commerce tools, Business Manager, JavaScript, ISML, SCSS, OCAPI/SCAPI and Commerce APIs.

- Built and supported integrations across commerce, CRM, marketing and third-party services, translating business requirements into maintainable technical solutions.
- Participated in technical decision-making, code reviews, mentoring, stakeholder discussions and delivery planning, balancing platform constraints with customer experience and commercial goals.

Senior Software Engineer | EPAM Anywhere Apr 2022 - Present

Concurrent long-term remote client engagements across healthcare, enterprise technology and energy.

Baker Hughes - Full Stack Developer | 2025 - Present

- Develop enterprise applications for operational data visualization, alerting and internal tools using JavaScript, C#, .NET, ASP.NET Core, SQL Server, Entity Framework and Azure.
- Implement frontend and backend features, REST APIs, business logic, integrations and data transformations used by corporate teams to monitor operational information and act on alerts.
- Support production systems, refactor legacy code, review changes and collaborate with international engineering and business stakeholders on feature design and delivery.

Oracle Health - Key Developer | 2024 - 2025

- Worked as a key developer on a healthcare platform within the Oracle ecosystem, using Oracle frameworks, Oracle JET, Oracle Visual Builder, JavaScript/TypeScript, Java and Oracle Cloud Infrastructure.
- Implemented and maintained enterprise features, cloud integrations and APIs while following Oracle engineering, security and quality standards.
- Served as a technical reference for assigned modules, contributing to solution analysis, troubleshooting and collaboration across distributed teams.

Equality Health - Frontend Lead | 2022 - 2024

- Led frontend development for a healthcare platform using React, Next.js and Sass, with two developers reporting directly to the frontend workstream.
- Owned frontend architecture decisions, task planning, mentoring, code reviews, reusable component patterns, API integration and coordination with product, design, backend and QA stakeholders.
- Improved maintainability and delivery consistency by establishing coding conventions, reviewing implementation approaches and driving resolution of performance and UX issues.

ADDITIONAL CONTRACTOR ENGAGEMENTS

Senior Full Stack Developer - Contractor | Whale & Jaguar Sep 2021 - Sep 2022

- Owned most of the development of Oceana, an AI-powered social media analytics and optimization platform built with React, Python, Azure and Hugging Face.
- Integrated Meta Graph APIs and OAuth flows to collect and analyze account activity, audience data, reach, publication performance and competitor signals.
- Implemented NLP and sentiment-analysis workflows using Hugging Face/Transformers and Python services, and generated AI-driven recommendations for publishing schedules, content themes and KPI improvement.
- Built dashboards, backend services and cloud components using React, Python frameworks, SQL/PostgreSQL, MongoDB, Azure App Service, Azure Functions, Azure Storage, Docker, Git and CI/CD.

Full Stack Developer Semi Senior - Contractor | 10Pearls Jun 2021 - Jun 2022

- Contributed to Cyberbank digital banking web and mobile products using React, React Native, Node.js, NestJS, TypeScript, SQL and MongoDB.
- Developed microfrontends, reusable npm libraries, shared UI/utility packages and cross-platform mobile features while applying design patterns and modular architecture practices.
- Built and integrated REST APIs, Redux-based application state, Jest tests and backend services; supported Docker and CI/CD workflows in a distributed product environment.

Junior Developer - Contractor | Grability Mar 2021 - Jun 2021

- Worked on frontend refactoring and quality assurance for a Bolsa de Valores de Colombia project using React, JavaScript, HTML5 and CSS3.
- Executed manual, regression and end-to-end testing, automated critical flows with Selenium/ChromeDriver and documented defects through Jira in an agile/Scrum environment.
- Collaborated with developers and QA engineers to validate fixes and improve stability during a broad application modernization effort.

Full Stack Developer - Contractor | Imometrics Aug 2020 - Jan 2021

- Developed features for an IoT platform that received, processed and visualized temperature and humidity readings from connected devices in real time.
- Implemented real-time alarm rules and SMS notification flows for threshold breaches using Python, PHP, AWS, REST/JSON integrations, AWS SNS and Twilio.

- Worked with WebSockets, MQTT, Redis, RabbitMQ, Celery and scheduled jobs for event processing and background tasks, with data persisted in MySQL/PostgreSQL and services deployed on AWS EC2/RDS/S3 with CloudWatch monitoring.
- Built and maintained frontend views with JavaScript, HTML and CSS and supported Linux/Git-based development and production troubleshooting.

ADDITIONAL STRENGTHS

Technical leadership and mentoring • Stakeholder management • Architecture and solution design • Code reviews • Agile/Scrum delivery • Jira • Production support • Cross-functional collaboration • E-commerce and CRM integrations • Marketing automation • Data quality and governance • Enterprise integration • AI-assisted product development
